Preliminary Amendment - New U.S. Application Inventors: Thierry Quillet and Daniel Gloaguen "Device for Linking a Wire and a Contact Element" Page 2

- 2. (currently amended) Device according to claim 1 eharacterized in that wherein a first end (11, 13, 14) of the intermediate tube is crimped around the strands of the wire, and around a shaft (8) of this wire.
- 3. (currently amended) Device according to elaims 1 through 2 claim 2 eharacterized in that wherein the contact element is fixed in force at a second end (17, 19) of the tube.
- 4. (currently amended) Device according to elaims 1 through 3 claim 3 eharacterized in that wherein the contact element is comprised of copper.
- 5. (currently amended) Device according to elaims 1 through 4 claim 4 wherein eharacterized in that the strands are comprised of aluminum.
- 6. (currently amended) Device according to elaims 1 through 5 claim 5 characterized in that wherein the tube is comprised of aluminum.
- 7. (currently amended) Device according to <u>claim 6</u> elaims 1 through 6 characterized in that <u>wherein</u> the intermediate tube is internally covered with a ductile and conductive material, for example gold, silver or tin.
